

REINFORCEMENT POLICY

The Reinforcement plan is designed in such a way that it basically works as a recap tool for the child. The assignments are fun and engaging and are also application based. It makes the child read the chapters thoroughly and look for answers. Doing the given assignments, helps the child to learn and revise what has been taught in class; there by keeping the child up-to-date with what is taught. The School strictly follows a Reinforcement schedule to ensure that students are not burdened with too much. Every class has an Assignment log book where teachers ensure that no more than the planned reinforcement activities are given to students. The teachers ensure that students get enough gap to complete longer assignments by giving them a late submission date. Over the weekend, each Grade gets reinforcement worksheets/activities for one additional subject.
